The Havening Technique for Trauma release.

Simpler than I even imaged. Gently rub your face, your hands and then your arms, like so.

It was developed by two brother’s Dr Rod Ruden and Dr Steven Ruden and it has been named after the concept of finding a Safe Haven. It is an Amygdala Depotentiation Technique (ADT). Refer to [www.havening.org](http://www.havening.org).

What is Havening and how does it work. By Tam Johnston.

The Havening Technique simply slows the brain waves down.

The touch calms the fast trauma Gamma Waves and replaces them with Delta Waves.

How is Trauma created. The four steps of EMLI.

1. Event
2. Meaning
3. Landscape
4. Inescapable.

What are the Trauma symptoms to look for. CASE.

1. Cognition. Stories of a or several external events.
3. Somatosensory. Mind effects the body in posture, pain, pressure or constrictions.
4. Emotions. Anxiety depression and fear symptoms.

Key words to consider when the Haven Technique could be of value.

Fear of: - Abandonment, attachment, being trapped, heights, open spaces, predators, creepy crawlies, phobias, suffocation, failure, success, poverty, wealth, health, sickness, sleep deprivation, guilt, shame, obsessiveness, chronic pain, substance abuse, mind body integration.
