#### **Exercise in Lucid Dreaming. Converting Nightmares into Happy Dream instructions.**

<u>Dreams and nightmare</u> are directions and instructions coming from your inner self (subconscious and super consciousness mind) to outer self (conscious and ego mind) if understood and used.

<u>Lucid dreaming</u> is a process of recording a dream or nightmare, reviewing the symbols and preparing your possible meaning combination. Then by asking for a revised dream the next night (or so), you are able to request a direct clarification of the dream meaning and/or a changed outcome.

#### Oneironaut. Oneironaut is a consciously aware traveller in a Lucid Dream.

I would like to introduce you to the term of O-neiro-naut. An Oneironaut is a traveller who can travel in a dream consciously. This is instead of being an Astronaut, a person who travels beyond the earth's atmosphere. Conscious dream travellers can change the outcomes of the dream both at night and during the day.

Let us look at some terms around this field of study which includes Oneironautics and how to improve the experience and the triggering of a Lucid Dream and prolonging of a Lucid Dream state.

**MILD** - Mnemonically Induced Lucid Dreaming. Using Mnemonic triggers which can include words, phases or music before sleep to prepare for Lucid activate during sleep or to confirm an action within a dream to make it a lucid dream.

**DILD** – Dream Induced Lucid Dreaming. This is where during a dream you trigger lucidity.

**FILD** – Finger Induced Lucid Dreaming. Between sleeps during the night tap your fingers to induce sleep and lucid dreaming to start as you fall back to sleep.

**Reality Checks.** Simply ask in a dream 'Am I Dreaming.' Can you switch the lights off. What do I look like in a mirror. Do I look like my twenty-five-year-old self or my current age?

**Dream Signs.** Does it have people for direction, buildings for attitudes and vehicles for the body. Would this dream be a current warming for my everyday life which I will need to take immediate precautions for so that the event does not happen or to reduce the consequences of that event. Would this dream be a learning experience for daily soul growth. Would the dream be a preparation for humanities benefit.

**WILD** – Waker or Wake Induced Lucid Dreaming is where the wake person enters the dream state while being awake. This is what is happening when you are recalling the dream material from the evening sleep state and typing out the dream on a computer.

**ADA** – All Day Awareness. This extends the WILD experience to an all-day experience.

**DEC – Dream Eternity Curiosity** is a term describing knowledge beyond the Universe to include Source Energy and is known by the Eternal Symbol of the sound and light of AUM a '**Dot within a circle or zero point.'**

## Lucid dreams as a bridge between realities | Chongtul Rinpoche | TEDx Fulton Street

Chongtul Rinpoche, of the Bon Native Tibetan tradition. He talks about using lucid dreaming to be awake both at night and during the day to the fifth-dimension knowledge. The Bon tradition uses and repeats the words Ra, La, Sha and Sa to release and calm the constant chatter going on in your left-brain mind so as to enter a Lucid Dream. **Source:** https://www.youtube.com/watch?v=exjlR7izakg&list=RDLVexjlR7izakg&start\_radio=1&t=1s

## These symbols will assist us to understand the duality of both our female and male selves.

Jung used the words of animus and anima to describe our two unconscious selves. Animus is described as the unconscious masculine side of a woman, and the anima as the unconscious feminine side of a man. Combined, these two halves will assist us to understand our full psychic, soul and connection with Source Energy nature.
